

Investment Objective

The objective of the fund is to create long-term wealth for investors by extracting alpha from equity markets.

Fund Profile

The portfolio is managed as a long/short hedge fund, focused on extracting beta and alpha returns from the South African equity market. The funds returns are delivered through fundamental knowledge of South African equities vis-à-vis economic growth and broad economic themes as well as medium to long -term relative valuation opportunities, generating the largest portion of its returns through its directional bias. Relative value pairs, together with absolute longs and shorts seek to stabilize returns in turbulent market conditions, supported by the adjustment to the net exposure.

Cumulative Performance Since Inception

The investment performance is for illustrative purposes only; the investment performance is calculated by taking the actual initial fees and all ongoing fees into account for the amount shown; assuming income is reinvested on the reinvestment date.

The above benchmark(s) are for comparison purposes with the fund's performance. The fund does not follow the benchmark(s). Please note: The benchmark changed from FTSE/JSE Capped Swix All Share Index to FTSE/JSE Capped All Share from January 2026.

Return Analysis (Annualised)

The risk category shown is not guaranteed and may change over time. The lowest category does not mean the investment is risk free. There may be other special areas of risk relating to the investment including liquidity risk, credit risk, market risk, and settlement risk. FundRock Management Company (RF) (Pty) Ltd, ("the manager"), and the investment manager do not render financial advice. Our risk indicator does not imply that the portfolio is suitable for all types of investors. You are advised to consult your financial adviser.

Market Commentary

Global markets rebounded in April, recovering much of the weakness experienced during March despite persistent geopolitical tensions in the Middle East and elevated oil prices. Investor sentiment improved materially during the month as markets increasingly focused on resilient corporate earnings, continued AI-driven capital expenditure and robust US data, rather than near-term geopolitical risks. Global equities delivered strong gains, led by technology and semiconductor companies, while defensive sectors lagged as risk appetite returned. At the same time, higher energy prices reinforced inflation concerns globally, causing investors to significantly reduce expectations for interest rate cuts across developed markets and placing upward pressure on global bond yields.

In the United States, equities rallied sharply as investors returned aggressively to growth stocks. The Nasdaq gained 15.3% during the month, while the S&P 500 rose 10.5% and the Dow Jones advanced 7.2%, with semiconductor and AI-related companies leading the recovery. Strong first-quarter earnings and continued optimism around AI infrastructure spending supported sentiment, while broader cyclical sectors also benefitted from improving risk appetite. The macro backdrop remained more challenging, however, with headline inflation rising to 3.3% in March, largely due to higher fuel prices linked to the Middle East conflict. The Federal Reserve kept interest rates unchanged and maintained a cautious stance on monetary policy, as markets significantly scaled back expectations for rate cuts during the remainder of 2026.

The MSCI China All Shares Index rose approximately 5.8% in US dollar terms, supported by stable policy messaging and resilient domestic liquidity conditions. Economic data remained mixed, with manufacturing activity stabilising near expansionary levels, although weak domestic demand and continued stress in the property market continued to weigh on broader sentiment. Taiwan and South Korea's equity markets were key drivers of overall strong EM equity performance as AI-related stocks in those markets rallied sharply.

Commodity markets experienced significant volatility during April, driven by geopolitics. Brent crude oil traded in a wide range of roughly US\$90 to US\$120/barrel before ending the month around US\$114/barrel amid uncertainty surrounding supply disruptions and shipping routes through the Strait of Hormuz. Precious metals were weaker overall, with gold declining 1% to approximately US\$4,618/oz as higher real yields and a stronger US dollar offset safe-haven demand. Industrial metals rebounded in April, with the LME Metals Index up 4.5% and Copper up 5.6%. Agricultural commodities also moved higher during the month as rising fuel and fertiliser costs contributed to concerns around global supply conditions.

South African markets delivered modest gains during April. The Capped All Share Index rose 1.6%, supported by financials (+2.6%) and industrials (+2.3%), while resources declined 2.4% amid weakness in precious metals counters. Local bond markets performed strongly, with the All-Bond Index returning 3.3%. Inflation edged higher to 3.1% in March, although the full impact of April's fuel and electricity price increases is still expected to filter through in the coming months. Petrol prices increased by more than R3/litre, diesel by around R6/litre, and Eskom's 8.8% tariff increase came into effect during the month. The rand weakened to around R16.67/US\$ as South Africa's vulnerability to elevated oil prices and broader emerging market risk aversion weighed on sentiment. MSCI South Africa rallied 2.2%, underperforming MSCI World (+9.4%) and MSCI EM (+14.5%) in US dollar terms.

The Silver Oak fund outperformed its Capped All Share benchmark by 0.4% during April. A long position in Sasol added most to outperformance (+0.75), as did long positions in Naspers/Prosus (+0.4%), MTN (+0.3%), Harmony (+0.3%) and Anheuser Busch (+0.2%). A short position in a diversified miner and a long position in an Oil note detracted most this month.

Please Note: The above commentary is based on reasonable assumptions and is not guaranteed to occur.

Glossary

Net Asset Value (NAV) :	Means net asset value, which is the total market value of all assets in a portfolio including any income accruals and less and deductible expenses such as audit fees, brokerage and service fees.
Annualised Return :	Is the weighted average compound growth rate over the performance period measured.
Highest & Lowest Return :	The highest and lowest rolling twelve-month performance of the portfolio since inception.
Total Expense Ratio (TER) :	Reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's.
Transaction Costs (TC) :	Is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns.
Total Investment Charges (TIC) :	Should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager.
Total Investment Charges (TIC%) :	= TER (%) + TC (%): The Total Investment Charges (TIC), the TER + the TC, is the percentage of the net asset value of the class of the Financial Product incurred as costs relating to the investment of the Financial Product. It should be noted that a TIC is the sum of two calculated ratios (TER+TC).
Standard Deviation :	The deviation of the return of the portfolio relative to its average.
Drawdown :	The greatest peak to trough loss until a new peak is reached.
Sharpe Ratio :	The ratio of excess return over the risk-free rate divided by the total volatility of the portfolio.
Sortino Ratio :	The ratio of excess return over the risk-free rate divided by the downside deviation of the portfolio.
Correlation :	A number between -1 and 1 indicating the similarity of the dispersion of returns between the portfolio and another asset or index with 1 being highly correlated, -1 highly negatively correlated and 0 uncorrelated.
Value at Risk (VaR) :	Value at risk is the minimum loss percentage that can be expected over a specified time period at a predetermined confidence level
Leverage/Gearing :	The use of securities, including derivative instruments, short positions or borrowed capital to increase the exposure beyond the capital employed to an investment.

Fund Risk

Leverage Risk :	The Fund borrows additional funds, trades on margin or performs short sale trades to amplify investment decisions. This means that the volatility of a hedge fund portfolio can be many times that of the underlying investments due to leverage on a fund.
Derivative Risk :	Derivative positions are financial instruments that derive their value from an underlying asset. Derivatives are exposed to implicit leverage which could result in magnified gains and/or losses on the portfolio.
Counterparty Credit Risk :	Counterparty risk is a type of credit risk and is the risk of default by the counterparty associated with trading derivative contracts. An example of counterparty credit risk is margin or collateral held with a prime broker.
Volatility Risk :	Volatility refers to uncertainty and risk related to size of change of an instrument or portfolio. It is a statistical measure of the dispersion of returns for a given security or market index. Volatility is proportional to the directional exposure of a portfolio and is measured by Value at risk (VaR) which is a statistical technique used to measure and quantify the level of volatility.
Concentration and Sector Risk :	A large proportion of total assets invested in specific assets, sectors or regions. Concentrated positions or concentrated sectors in a portfolio will material impact the returns of the portfolio more so than diversified portfolios.
Correlation Risk :	A measure that determines how assets move in relation to each other. Correlation risk arises when the correlation between asset-classes change. Correlation risk also arises when the correlation within an asset-class changes. Examples of correlation within asset classes include equity pairs trading, fixed income curve trading and commodities pairs trading.
Equity Risk :	Applies to investment in shares or derivatives based on shares. The market price of shares varies depending on supply and demand of the shares. Equity risk is the risk of loss due to the drop in the market price of shares. Equity risk can either be systematic risk which is risk to the entire market based on political and economic indicators or unsystematic risk which is company specific and includes risk relating to company profits, future prospects and general consensus on the company or sector.

Portfolio Valuation & Transaction Cut - Off

Portfolios are valued daily. The cut off time for processing investment subscriptions is 14:00pm on a business day.

Total Expense Ratio

A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs are a necessary cost in administering the financial product and impacts financial product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER.

Mandatory Disclosures

Investment Manager: Fairtree Asset Management (Pty) Ltd, Registration Number: 2004/033269/07 is an authorised Financial Services Provider (FSP25917) under the Financial Advisory and Intermediary Services Act (No.37 of 2002), to act in the capacity as investment manager. This information is not advice, as defined in the Financial Advisory and Intermediary Services Act (NO.37 of 2002). Please be advised that there may be representatives acting under supervision. Physical Address: Willowbridge Place, Cnr. Carl Cronje and Old Oak Road, Bellville, 7530. Postal Address: PO Box 4124, Tygervalley, 7536. Telephone Number: +27 86 176 0760. Website: www.fairtree.com. Management Company: FundRock Management Company (RF) (Pty) Ltd (the "Manager"), Registration Number: 2013/096377/07, is authorised in terms of the Collective Investment Schemes Control Act (CISCA) to administer Collective Investment Schemes (CIS). Physical Address: Catnia Building, Bella Rosa Office Park, Bella Rosa Street, Bellville, 7530, South Africa. Telephone Number:+27 (0)21 879 9937/(0)21 879 9939. Website: www.fundrock.com, Trustee: FirstRand Bank Limited (acting through its RMB Custody and Trustee Services Division). Physical Address: 3 Merchant Place, Ground Floor, Corner Fredman and Gwen Streets, Sandton, 2146 Telephone: +27 87 736 1732. Collective Investment Schemes are generally medium to long-term investments. The value of participatory interests (units) may go down as well as up. Past performance is not necessarily a guide to future performance. The performance is calculated for the portfolio, as well as that the individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Performance fees will be calculated and accrued on a daily basis based upon the daily outperformance, in excess of the benchmark, multiplied by the share rate and paid over to the manager monthly. Collective investments are traded at ruling prices and can engage in scrip lending and borrowing. A schedule of fees, charges, minimum fees and maximum commissions, as well as a detailed description of how performance fees are calculated and applied, is available on request from Fundrock Management Company (RF)(Pty) Ltd ("the Manager"). The Manager does not provide any guarantee in respect to the capital or the return of the portfolio. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressure and in such circumstances, a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. Commission and incentives may be paid, and if so, are included in the overall costs. The Manager may close the portfolio to new investors in order to manage it efficiently according to its mandate. Prices are published daily on our website. Additional information, including key investor information documents, minimum disclosure documents, as well as other information relating to the basis on which the manager undertakes to repurchase participatory interests offered to it, and the basis on which selling and repurchase prices will be calculated, is available, free of charge, on request from the Manager. The value of an investment is dependent on numerous factors which may include, but not limited to, share price fluctuations, interest and exchange rates and other economic factors. Where foreign investments are included in the portfolio, performance is further affected by uncertainties such as changes in government policy, political risks, tax risks, settlement risks, foreign exchange risks, and other legal or regulatory developments. The Manager ensures fair treatment of investors by not offering preferential fee or liquidity terms to any investor within the same strategy. The Manager is registered and approved by the Financial Sector Conduct Authority under CISCA. The Manager retains full legal responsibility for the portfolio. FirstRand Bank Limited, is the appointed trustee. Fairtree Asset Management (Pty) Ltd, FSP No. 25917, is authorised under the Financial Advisory and Intermediary Services Act 37 of 2002 to render investment management services.
